CANADA'S LARGEST SUPPLIER OF RACKING & SHELVING

Who We Are

Proudly Canadian

As Canada's largest manufacturer and provider of pallet racking, shelving and product storage systems, we have been helping customers improve their product storage and throughput capabilities with innovative products and creative solutions for over 40 years.

We pride ourselves on our:

- **Versatility** - All sizes of installations from small to very large and complex.
- **Service** - Provide top-quality service from a project's design concept to installation and beyond.
- **Value** - Help you meet your operational objectives and maximize your budget.
- **Systems Integration** - We'll help you discover the right blend of systems to suit the unique needs of your business.
- **Prompt, Ethical Service.**

We Talk Your Language

Contact us for a free consultation. Our tradition of innovation and customer service continues to provide product storage solutions for today's independent small businesses right through to large multi-national distribution centres.

Equipment Leasing Available

Equipment leasing gives you the flexibility to use funds to grow your business in other areas.

A few advantages of leasing equipment:

- Upgrade your racking with low monthly payments
- Preserve capital
- Eliminate obsolescence
- Fixed payments through the term of the lease

Note: Every effort has been made to ensure the accuracy of the information in this catalogue. However, please note that products may not always be exactly as pictured and we assume no liability, direct or indirect, for any errors that may occur in this catalogue. Prices and product descriptions are subject to change without notice. If there are any errors in pricing in this catalogue, we shall not be obligated to honour the erroneous price, and the correct price at the time of order shall be applied.

Which Storage Solution is Right for You?

Whether it be for home, retail, commercial or industrial purposes, we can help you better utilize your space and get you organized. We offer a vast array of product storage solutions to suit your business; from easy to assemble steel shelving to multi-level pick modules for large distribution centres.

This three page section provides brief illustrated summaries, operational considerations and benefits for some of the most common product storage solutions we offer, while also putting into plain words, typical shelving, racking and storage systems terminology.

We have many standard "In Stock" storage solutions that can be shipped within 48 hours, or we can provide customized storage solutions that take into account the unique requirements of your business. Our staff of pallet rack and shelving experts can help you determine the optimum solution for your business.

We carry Canada's largest stock of NEW & USED material at affordable, everyday pricing. If USED material is an option you'd like to consider, refer to Page 31 for additional information.

No-Bolt Shelving

OPERATIONAL CONSIDERATIONS

- Ideal for medium case and piece pick applications
- Heavy Duty industrial steel shelves
- Boltless shelves – special clips allow quick adjustment of shelf heights
- Baked enamel finish
- Typical shelf widths 36", 42" and 48"

Wide Span Shelving

OPERATIONAL CONSIDERATIONS

- Fast, easy assembly
- Ideal for record storage, retail and grocery applications
- Great for hand stacking operations
- Can be fitted with wire mesh decks, wood decks, or galvanized drop-in-panels
- Bay widths typically 48", 72" or 96"

Selective Rack

OPERATIONAL CONSIDERATIONS

- Advantageous for high SKU counts, with pallet in/pallet out or pallet in/ case out movements
- Superb selectivity, improved productivity
- Every pallet has a facing
- Flexible - no special lift trucks required
- Maintains FIFO (First in, First Out)

Double Deep Rack

OPERATIONAL CONSIDERATIONS

- Advantageous for low to medium SKU counts, with pallet in/pallet out movements
- Selectivity reduced 50% vs. Single Selective Rack
- Utilizes deep reach lift trucks
- Modified FIFO (First In, First Out)

Drive-In Rack

OPERATIONAL CONSIDERATIONS

- Advantageous for low SKU counts, with medium to high activity and pallet in/pallet out movements
- Flexible - uses counterbalanced lift trucks or reach trucks
- Maintains LIFO (Last In, First Out)

Push Back Rack

OPERATIONAL CONSIDERATIONS

- Advantageous for medium to high SKU counts, with medium to high activity and pallet in/pallet out movements
- Flexible - suitable for use with either counterbalanced or reach lift trucks
- All pallets are accessed from the aisle
- Typically LIFO within the lane

Pallet Flow Rack

OPERATIONAL CONSIDERATIONS

- Advantageous for low SKU counts, with high activity and pallet in/pallet out movement, where strict FIFO is required
- Eliminates lift truck contention by segregating picking and replenishment
- Flexible - suitable for use with either counterbalanced or reach lift trucks

Carton Flow

OPERATIONAL CONSIDERATIONS

- Improves pick rates
- Ideal for full case and split case picking
- Separates replenishment from picking activity, eliminating contention
- Can be integrated with standard pallet rack, allowing replenishment storage above

Cantilever Rack

OPERATIONAL CONSIDERATIONS

- Suited to items such as building materials, piping, rolls, furniture and sheet goods
- Arm heights are adjustable to suit product spacing requirements
- Can be configured as single-sided or double-sided
- Use with counterbalanced or reach truck

Mezzanines

OPERATIONAL CONSIDERATIONS

- Provides wide spans with minimal column interference at lower levels
- Multi-Functional - use with standalone shelving, carton flow & wide span shelving
- Multiple flooring options available
- May be dismantled and relocated
- Customizable

Roll Formed Racking

We manufacture and stock Canada's largest, most extensive line of roll formed racking products. Whether you're looking for racking to suit a small retail operation or a large distribution centre, we have been providing the best product storage solutions throughout Canada for over 40 years. Our racking and shelving based storage solutions can be found in the majority of Canada's warehouses and distribution centres.

Our roll formed racking line forms the base from which we can build many unique, customer focused product storage solutions.

- Selective Pallet Rack
- Double Deep Rack
- Push Back Rack
- Cantilever Rack
- Pick Modules
- Bolted Pallet Rack
- Drive-In Rack
- Pallet Flow Rack
- Carton Flow Rack
- Very Narrow Aisle

All of our roll formed racking products come with a durable powder coated finish.

Call for a free, no-hassle consultation with one of our storage solutions experts.

BOLTED PALET RACK

QUICK SHIP PROGRAM

A small sampling of our large in-stock selection of new material - we keep these common items available for quick turn-around:

Uprights 42" wide – available in 8', 10', 12' and 16' heights*

Box and Step Beams – available in 8', 9' 10' and 12' lengths*

Safety Bars – available in 42" lengths to suit box or step beams

Wire Mesh Decks – 42" x 46"

** (sizes and availability may vary depending on location)*

WELDED PALET RACK

IS USED MATERIAL OKAY?

We have Canada's largest selection of used racking and shelving.

We keep material in stock throughout the country, in or near most major urban centres and can quickly service outlying areas from our branch offices.

See page 31 for further details on used material

friendly expert advice.*

Konstant's unique structural steel racking and product storage systems are made from high strength, hot rolled structural steel shapes supplied by state-of-the-art North American mills. Our structural steel racking and product storage systems are the most durable in the industry and are extremely well suited to the toughest warehouse conditions such as those found in food and grocery operations.

Konstant offers a full range of extra-rugged structural steel racking products and storage systems including:

- Selective Pallet Rack
- Push Back Rack - 2 to 6 Deep
- Double Deep Rack
- Furniture Rack
- Drive-In/Drive-Thru Rack
- Pallet Flow Rack
- Multi-Level Pick Modules
- Very Narrow Aisle (VNA) Rack

Safety Bars & Accessories

Utilized to prevent misplaced pallets from accidentally falling through the beams, safety bars give an added level of safety and protection for pallet racking. Safety bars are available to suit Built-In Step Beams and Box Beams.

Snap-In Safety Bars

Our patented Snap-In Safety Bar snaps into place on pre-punched, built-in step beams. The safety bar locks in place, providing maximum protection for people and equipment and it meets CSA standards without requiring mechanical fastening. Precision formed from high strength steel, it's able to withstand years of abuse.

Standard sizes in stock and ready to ship

NEW

ALL SNAP-IN SAFETY BARS
NOW COME WITH STANDARD
PRE-GALVANIZED FINISH.

SNAP-IN SAFETY BAR

Hook-Over Safety Bars

Our hook-over safety bars are manufactured from the same high strength steel as our beams and are available with cups to suit 1-1/2" (40 mm) or 2" (50 mm) beam depths. Each cup on the safety bar comes with a pre-punched hole for mechanically fastening the safety bar to the beam. Our hook-over safety bars work with both box and step beams.

Standard sizes in stock and ready to ship

HOOK-OVER SAFETY BAR

Safety Clips

Those small clips, pins or fasteners that come with your box or step beams are extremely important safety items for your racking. They prevent unintentional beam uplift, caused by lift trucks, from dislodging your beams. Always make sure they are in place. Call us if you need replacements.

OUTSIDE WATERFALL

INSIDE WATERFALL

NEW COPY TBD

Wire Mesh Decks

Available in a wide range of configurations we can provide wire mesh decks to suit Step Beams, Box Beams and Structural Channel Beams. Wire Mesh Decks can be used as an alternative to standard safety bars, providing an extra level of safety for misplaced pallets as well as varying sizes of pallets. Unlike plywood or particle board decks, wire mesh decks are non-flammable and provide superior water access for in-rack sprinkler systems.

Benefits

- Made in North America
- No tools are required for installation - simply drop them in place
- Provide better hygiene than wooden decks
- Easier load identification
- Non- flammable
- Power coated finish
- Custom sizes, colours and configurations available (may extend lead time)
- Meets safety requirements for tunnel bays

Wire Mesh Deck Options & Accessories

- Upturned waterfalls or back stops to prevent packages from falling out the back
- Hanging dividers
- Quick clip dividers
- Flue dividers

Safety Netting & Guarding

Our rack guard safety netting systems offer a simple, affordable means of preventing packages from falling onto workstations below or onto adjacent walkways, protecting personnel from injury and packages from damage. Constructed of strong, durable, braided nylon rope.

Safety Netting

- Protect employees from falling cartons and packages
- Reduce product damage
- Can be installed vertically or horizontally to suit your protection needs
- Affordable and easy to install
- Protection for entire rows of racking or individual bays
- Kits can be provided for your specific needs

Wire Mesh Rack Guard

- Provides similar protection for employees as our safety netting but in a rigid form
- Helps reduce product damage
- Installs quickly as easily with nuts and bolts
- Available in standard and custom sizes
- Affordable walkway and work area protection

HORIZONTAL SAFETY NETTING

VERTICAL SAFETY NETTING

END OF AISLE PROTECTION

2 HIGH GUARD RAIL

WORKSTATION GUARDING

Rack Protection & Guarding

Heavy Duty Guard Rails can greatly enhance the safety of your facility and reduce the cost of damage caused by accidental collisions. When properly installed, these rugged guard rails can withstand a 10,000 lb. impact at a speed of 4 mph. The guard rail specifications are as follows:

Guard Rails

Heavy Duty Guard Rails can greatly enhance the safety of your facility and reduce the cost of damage caused by accidental collisions. When properly installed, these rugged guard rails can withstand a 10,000 lb. impact at a speed of 4 mph. The guard rail specifications are as follows:

- Finished in highly visible security yellow
- 5" x 5" posts
- 12" high rails
- Security cap on all posts
- Bolted connections
- 10" x 10" base plates

Post Protectors

Post Protectors provide individual, high visibility post protection and are available in 3 different standard sizes. Easy to install they protect the most susceptible part of your rack uprights from fork truck damage.

Rack Floor Guards

These medium duty rack guards provide excellent protection for the most vulnerable areas of your storage rack systems – row ends. Available as double sided or single sided, they are easy to install and provide critical protection from fork truck damage at both the front and side of your rack uprights.

Modular Rack & Column Guards

The innovative Protect-It® Post Guard and MAXI column guard combine advanced Computer Aided Engineering with state-of-the-art thermoplastics to deliver inexpensive, effective, and easy to install guarding for your rack posts and building columns. Made from super tough HDPE thermoplastic, its strength and unique design allow it to absorb impact loads in a spring like manner, preventing damage to posts and columns.

Protect-It® Post Guards

BENEFITS

- Installs easily by hand in just seconds
- Low purchase, installation and replacement cost
- Absorbs substantial fork lift impacts
- Ingenious design securely grips the post with no separate fasteners
- Effective in cold environments as low as -40° C
- Available to suit many types of rack post profiles

VERSATILE PALLET HANDLING

RadioShuttle®

Maintain maximum selectivity and increase your operational efficiency with the Radioshuttle pallet shuttle. Radioshuttle, also known as a pallet runner, is a semi-automated storage and retrieval system that allows for a maximum use of warehouse space. Easily managed with a remote control, the Radioshuttle pallet shuttle is loaded into storage loads and executes orders to load or unload pallets into a lane. The lanes are fed pallets by lift trucks such as reach trucks or sit down forklifts.

RADIOSHUTTLE APPLICATIONS

The Radioshuttle pallet runner system provides high-density storage and versatile pallet handling for applications with multiple pallets of storage for each SKU.

RADIOSHUTTLE PALLET SHUTTLE

The Radioshuttle pallet shuttle system provides high-density storage flexibility and customized designs for effective pallet handling. Battery-powered and remote-operated, Radioshuttle allows operators to work elsewhere while it is busy transporting pallets.

RADIOSHUTTLE PALLET RACKING SYSTEM

The Radioshuttle racking system and guidance rail aid the operator in loading Radioshuttle units into the structure and guides pallets into the first position.

Mezzanines (RAISED STORAGE PLATFORMS)

Double or triple your usable floor space without the expense of modifying your building or moving into a larger facility. Wide-Span Raised Storage Platforms (Mezzanines) are becoming increasingly popular as they enable more efficient use of existing space, provide affordable solutions to costly problems and offer a good return on investment.

Mezzanines

BENEFITS

- Engineered and designed to suit local and national building codes
- Custom design solutions available to suit each unique application
- Quick ship standard sizes available as well
- Pre-engineered connections throughout
- All materials come with a tough, durable finish
- Numerous flooring options available including Concrete, Bar Grating, Open Steel Plank, Plywood, Oriented Strand Board (OSB), ResinDek, and Mezzdeck
- Allows additional storage system products such as shelving and carton flow to be used within the mezzanine
- Can be designed to allow use of pallet jacks on elevated floors
- Numerous safety and fall protection devices available for upper levels

Designed and supplied entirely with pre-engineered connections, raised storage platforms can be assembled quickly.

They can just as easily be modified and expanded as requirements increase.

SECURE PROTECTION

Security & Fencing Partitions

Our wire mesh partitions can be purchased as pre-configured assemblies for quick delivery or custom designed to your specific needs.

Typical uses for wire mesh partitions:

- Security cages for high value or controlled substances
- Perimeter and machinery guarding
- Security cages for archival record storage or general storage with limited access
- As rack guards to protect from falling debris.

BENEFITS

- Easy to install with a few simple tools
- Pre-configured security cages are available in 2, 3 and 4 sided configurations
- Security cages are available with and without roof panels
- Various types of gates are available including swing, sliding, dutch door and service wicket styles
- Powder coated for an attractive, durable finish
- Available in standard grey or custom colours (at an extra cost) to suit

**PRE-CONFIGURED UNITS
AVAILABLE FOR QUICK
DELIVERY.**

QA Wide Span Shelving

QA Wide Span Shelving (sometimes known as Heavy Duty Shelving or Baby Rack) is strong, affordable and extremely versatile. It's ideal for an almost unlimited range of applications, from garage shelving to record storage to retail shelving and warehouse applications; it's great for hand stack operations where heavy capacity pallet racking isn't required.

The beams quickly and easily assemble onto the frames like standard pallet rack beams, only they're much lighter. Shelf and deck options include particle board, galvanized shelf panels and wire mesh decks or they can be utilized in various combinations as needed.

BENEFITS

- 1pc beam design for strength and safety
- Beams are adjustable on 2" centres
- Standard deck/shelf types available - particle board, galvanized panels and wire mesh decks
- All deck types fit flush to the top of the beam
- Provides unobstructed horizontal access widths up to 96"
- Stock sizes available for quick delivery

**STANDARD SIZES IN STOCK
AND READY TO SHIP**

MetalWare Shelving

Interlock No-Bolt shelving is among the most rigid in the industry. The shelves are produced from high strength cold-rolled steel and come complete with double-bends on all four sides and closed locking corners. The uprights – “Tee Posts” - are made of 16 gauge hot-rolled steel and are pre-punched, roll-formed, welded and cut-to-length in a continuous operation.

Economical • Efficient • Strong

BENEFITS

Interlok No-Bolt steel shelves are designed for maximum strength and durability. A superior quality shelf has been obtained by combining these exclusive features:

- Double folded closed corners for maximum support
- A two-way locking principle at each corner
- 1 3/16" flange on four sides plus a substantial return bend
- For heavier loads reinforcing bars are embedded in the front and rear of the shelf
- All shelves are pre-punched for Bin Dividers

Easy to assemble and fully adjustable afterwards without disassembling, Interlock No-Bolt Shelving can be used and purchased as a single bay or multiple bays. Additional bays are easy to add onto existing bays.

SHELVING PICK MODULE

AUTOMOTIVE PARTS STORAGE

HEALTH & BEAUTY PRODUCTS

METALWARE FEATURES:

1. Slotted Tee Post - Adjustable on 2" centres. Two-ply thickness with spot weld fabrication
2. Shelves – waterfall bend with return flange, overlap construction on inside corners, holes punched for bin dividers
3. Shelf Clips – Four compression style clips per shelf
4. Side Sway Braces – stabilizes open shelving units
5. Rear Sway Braces – stabilizes open shelving units
6. End Panel – encloses shelving ends. (2 Tee Posts spot welded to side panel)
7. Back Panel – Steel panel encloses shelving backs. Rectangular slots for mounting, brackets included
8. Bin Dividers – Enables shelves to be divided
9. Bolt-On Base Plate – Provides extra stability
10. Kick Plate – Completes bottom of shelving unit
11. Bin Fronts – 1", 2" or 3" high, they prevent small items from falling off shelves
12. Shelf Drawers – For small parts they come with two galvanized dividers
13. Label Holders – Available in 36", 42" or 48" lengths
14. Cabinet Doors – These 36" wide doors enable the shelving unit to be converted into a storage cabinet with lock-up security

"Helping Customers Achieve Success in Product Storage and Distribution"

Medium Duty Boltless Shelving

Smaller in size and capacity than our Heavy Duty product, it's excellent for record storage, bin boxes, bulk storage, small parts storage and is available for short and wide span applications. Great for up-front retail applications, it can easily be added to or reconfigured for seasonal product changes.

This product provides a wide variety of storage solutions for warehouse, retail, record box storage, stationary and office filing systems.

Carton Flow Track

Span-Track® full-width roller carton flow track can be added to any new or existing pallet rack system - no shelves or intermediate supports are required. Tracks can easily be picked up and moved or rearranged by hand to suit your individual SKU's. The beauty of **Span-Track®** is its simplicity and versatility.

Turn Any Pallet Rack Into a Full-Width Carton Flow System with Span-Track

These full-width flow racks are extremely robust and durable, allowing loading capacities of up to 50 lbs. per lineal ft. while also providing outstanding real world abuse resistance. The full-width 3/4" diameter rollers are made from tempered aluminum and spin on full length 3/16" diameter steel axles.

The roller/axle assemblies are fixed to galvanized steel support channels helping provide a remarkably efficient yet cost-effective carton flow product. The full-width rollers provide evenly distributed contact with the carton, eliminating hang-ups and as a result provide great product flow throughout your system.

Replace your plastic wheels for the last time!

- Heavy Duty, Quality design ensures that it can withstand the roughest of applications
- Seamless and unobstructed rollability
- Excellent lane tracking and re-starting - no sticking even when cartons sit for long periods of time
- Easily adjusted to changing SKU's
- **Span Track®** fits into any new or existing rack structures
- Available in track widths of 6", 9", 12" and 15"

EASILY INCREASE YOUR PICK RATES

"Helping Customers Achieve Success in Product Storage and Distribution"

SPAN TRACK

FLOW BED

ERGONOMIC DESIGN

Roller Rack System

Increase Pick Rates by Up to 30%

If you don't have existing racking or would like a stand-alone bay of carton flow racking, Roller Rack is a great option. Roller Rack is available as a complete stand-alone package, with uprights, beams and carton flow track. A complete bay can be assembled in about 1 hour, with no tools required.

Roller Rack easily creates a dynamic storage medium, allowing all picking operations to be performed at the front of the system and replenishment to take place at the back of the system. As cartons are removed from the system on the picking side, new product rolls forward to replace those removed. Carton flow can increase pick rates up to 30% versus static storage and introduces a more ergonomically safe picking process.

BENEFITS

- Roller Rack can be configured to work with two types of flow product – Span Track® or Flow Bed®
- Ultra durable, with capacities of up to 50 lbs. per lineal foot
- Easily customized to fit your specific needs with standard "mix & match" components
- Simple to reconfigure or add additional bays
- Easy to assemble, no tools or hardware required
- Additional productivity accessories and enhancers available

SEE BACK COVER FOR TOLL FREE NUMBERS - VISIT US ONLINE FOR ADDITIONAL PRODUCT DETAILS

Pallet Truck

Budget conscious with a 5,000 lbs. capacity, this truck includes:

- Durable entry and exit rollers
- Adjustable push rods to allow for field adjustment
- Ergonomically designed, 3-position handle
- Self-lubricating bushings at all pivot points
- Hydraulic pump with over-load bypass valve
- Minimum fork height of 3"
- Precision steer wheel and rollers

Electric & Manual Lifts

The Quick-Lift ERGONOMIC 3000, has a 3,000 lbs. capacity and is available as manual lift or as an electric lift. It can help boost productivity while helping reduce repetitive strain movements and injuries.

BENEFITS:

- Eases positioning for a wide variety of applications
- Durable steel construction for maximum stability
- Lightweight and easy to use
- Minimum height of 3 1/4"
- Maximum height of 31 1/2"
- Fork widths of 20 1/2" or 27" available
- The electric model is best for applications requiring frequent raising and lowering
- The electric model includes 12 volt battery and built-in charger

"Helping Customers Achieve Success in Product Storage and Distribution"

Used Racking & Shelving

We are Canada's largest supplier of used racking, shelving and storage systems equipment. Our branches throughout the country carry used material that can provide significant savings over new material, so whether you're adding just a few shelves to an existing system or expanding your storage capabilities with a building addition, we can help you fill it with used racking, at a price that meets your budget.

Consider also, as an option to all new material, a combination of new and used material for your warehouse needs. If you don't mind some possible scuffs, labels, small dents and colour differences, a mix of new and used material can also significantly reduce your investment.

Our used material inventories typically fluctuate and turn over quickly throughout the year, so please call customer service to get the latest, most accurate used material stock listing information.

If you're looking for products such as Redirack, Cubic, Pacific, Master Series, Centennial, Interlake, Triple-A, Arcan, Space Aid, Metalware, Dexion, EZ-Rect, Span Track or others, call customer service to check what we may have in our used material inventory.

- Easy to reconfigure & relocate
- Pre-engineered connections
- Reduced stocking expense & lead times
- Reduced maintenance & repair costs
- More flexibility for stocking distributors
- Reduces potential freight damage
- Easier integration of accessories
- Powder Coated & Pre-Galv materials provide superior rust resistance
- Great resale value

Most noteworthy, our bolted product line can be easily adapted or reconfigured into the design of all storage system applications, including pallet flow, push back and drive-in racking!
